Saving Page Defaults

Saving selection criteria as defaults for individual report layouts ensures that the same settings automatically load when the user returns to that report at a later date.

Page Options	Use the Page Options button use pre-saved Customizations (defaults) and or to save new selection criteria for a Dashboard or individual Tab (pages).
Saving Page Selections	 Apply Saved Customization – brings up a list of previously saved page settings. Save Current Customization – For Me – save current page settings for future use and/or set as a default for that specific tab. Rename the selections if desired by writing the new name in the Name field. Edit Saved Customizations – brings up list of previously saved page settings. Delete "default" designation and/or edit individual selections.

After you have generated a report, choose a Report View. Each Report View contains a predefined set of columns that will appear in your report results after the column selectors.

- Each report view contains multiple columns. Users may use all or none, depending on report needs.
- Start selection criteria from left to right (highest level sort to most detailed.)
- The column selected at the far right will determine what chart field level you can drill on.
- Users may switch from one report view to another depending on the level of detail desired.
- Save page settings using the report view most commonly needed so that the page will load automatically when you navigate to that page.

Use a Column as a Prompt:

- 1. Using a Prompt allows you to view results for a single value (e.g. Program Code) at a time.
- 2. Right click on the column bar that you want to use as a prompt (filter)
- 3. The column will be removed.
- 4. The Column description will appear at the top of the report as a Prompt.
- 5. Use the drop down to change the prompt. The table results will be updated for that value.
